

ZHANGHONG (KEITH) LIN

201-281-8257 • New York, NY • [linkedin.com/in/zhanghonglin](https://www.linkedin.com/in/zhanghonglin) • linzhanghong666@gmail.com

SUMMARY

Results-driven **data analyst** with a strong foundation in **statistical analysis**, **data processing**, and full-stack application development. Skilled in transforming complex **datasets** into actionable **business insights** using **Python**, **SQL**, and BI tools such as **Power BI** and **Tableau**. Proven ability to build scalable **data pipelines**, design **analytical dashboards**, and deliver **data-driven recommendations**. Effective communicator with experience translating technical findings for non-technical stakeholders.

EDUCATION

Stony Brook University, Stony Brook, NY
Bachelor of Science in Applied Mathematics & Statistics
Bachelor of Science in Business Management

December 2025

PROFESSIONAL EXPERIENCE

Green Tree

New York City, NY

Data Automation Intern

June 2023 – August 2023

- Integrated **Power Automate** with **Microsoft Office** tools, streamlining **data workflows** and improving **data accuracy** across reporting processes
- Built interactive **KPI dashboards** using **Power BI** and **SQL**, enabling real-time visibility into key business metrics for stakeholders
- Designed and managed **relational databases** in **Microsoft Access** and **SQL**, ensuring **structured data storage** and efficient query performance

Stony Brook University

Stony Brook, NY

Teaching Assistant

February 2025 – May 2025

- Analyzed **student performance data** across assignments to identify error patterns and learning gaps, informing targeted review strategies
 - Developed **data-driven review sessions** and supplementary problem sets, improving midterm readiness and comprehension across the cohort
 - Optimized TA scheduling by collecting and **analyzing survey data**, aligning office hours with peak demand to maximize student engagement
-

PROJECTS

Smart Finance Analyzer (Full-Stack Data Application)

April 2026

<https://smart-finance-analyzer.vercel.app>

- Processed and cleaned **financial datasets** using **Pandas**, handling missing values and categorizing transactions to ensure data integrity
- Built **analytical pipelines** for **spending summaries**, category breakdowns, and **trend analysis**, surfacing key patterns in **user spending behavior**
- Designed RESTful APIs with **Flask** to serve structured **analytical outputs**, ensuring efficient **data processing** and consistent response formats
- Deployed production application on Render (backend) and Vercel (frontend), resolving cross-environment dependency and build issues

Pricing Strategy & Profitability Analysis (Excel + Python)

May 2026

- Analyzed 145K+ **sales transactions** to evaluate revenue (\$52.9M) and profit (\$17.6M), identifying margin performance differences across products and regions
 - Built **KPI models** (revenue, profit, margin, discount) using **Python (pandas)** and **Excel** to structure data for analysis and decision-making
 - Assessed discount impact on profitability using **PivotTables**, revealing margin decline from ~37% to ~10% at higher discount levels, informing pricing strategy adjustments
-

SKILLS

Programming: **Python**, **R**, **SQL**, **VBA**

Data Analysis: **Data Cleaning**, **Data Transformation**, **Statistical Analysis**, **Trend Analysis**, **Feature Extraction**

Tools & Technologies: **Excel**, **Tableau**, **Power BI**, **MySQL**, **Power Automate**, **Flask**, **Pandas**

Platforms: **Render**, **Vercel**, **Claude Code**
